TeamID+PlayerID(pseudocode)

```
Enter teamID_playerID()
{
while true {
    if success==1
 while true
      read player id
       if success ==1
      read player rank
  read player role
 else
 print"invalid player ID"
 break;
    endif
}
else
print"invalid team ID"
Break;
endif
}
```
